

Circular Supply Chain and Waste Reduction

Transforming Waste into Value Through Circular Thinking !

Program Overview

As global industries shift toward sustainability, organizations are under increasing pressure to rethink how resources are used, reused, and recovered. This training program on Circular Supply Chain and Waste Reduction equips professionals with practical tools and strategies to transition from traditional linear models to efficient, circular systems.

The program emphasizes real-world applications, enabling learners to identify inefficiencies, improve material reuse, and implement circular solutions. Designed for supply chain and operations professionals, it builds practical skills to create resilient, cost-effective, and environmentally responsible supply chains that drive long-term value.

PROGRAM AT A GLANCE

- 14th, 15th, and 16th July 2026
- 9:00 AM – 1:30 PM (GMT+3)
- 12 Credit Hours
- Virtual

Key Learning Outcomes

- ✓ Understand how circular economy principles apply specifically to supply chains and waste reduction.
- ✓ Apply practical tools and methodologies to map flows, identify hotspots, engage suppliers, redesign systems, and prioritize action.
- ✓ Develop a realistic action roadmap for circular supply chain implementation across relevant sectors.

COURSE COVERAGE

Module 1: Circular Supply Chain Foundations

- Linear vs circular supply chains
- Circular economy principles and value loops
- Strategic importance of circularity in supply chains
- Sector-based applications and value chain thinking

Module 2: Flow Mapping & Waste Diagnostics

- Supply chain and material flow mapping
- Identification of waste hotspots and inefficiencies
- Material Flow Analysis (MFA) basics
- Establishing circularity baselines and KPIs

Module 3: Circular Procurement & Supplier Engagement

- Circular procurement strategies and criteria
- Supplier collaboration for improved circularity
- Product data, specifications, and transparency
- Embedding circularity into sourcing processes

Module 4: Waste Reduction in Operations & Logistics

- Waste hierarchy and operational efficiency
- Packaging optimization and reuse systems
- Reverse logistics and recovery strategies
- Prioritization of circular interventions

Module 5: Circular Business Models & Design

- Circular business model innovation
- Product and packaging design for circularity
- Digital enablers and traceability (e.g., DPP)
- Application of circular design tools

Module 6: Measurement & Implementation Roadmap

- Circularity metrics and KPI selection
- Governance and cross-functional alignment
- Roadmap development and prioritization
- Monitoring, reporting, and continuous improvement

INSTRUCTOR

Lluís Torrent

Lluís Torrent is an experienced Climate Change and Circular Economy consultant with over 20 years of international expertise in sustainability, climate policy, and green transition initiatives. He has worked with leading global organizations including the European Commission, UNDP, World Bank, and regional development banks across multiple continents.

Lluís has contributed to over 100 projects in 40+ cities and 28+ countries, covering all stages of the project cycle from design and implementation to monitoring and evaluation. He specializes in climate strategies, sustainable energy planning, and circular economy solutions for governments and institutions.

His technical experience includes climate risk assessments, renewable energy and energy efficiency projects, and contributions to major international programs and EU Green Deal initiatives. He has also supported Nationally Determined Contributions (NDCs) and led extensive stakeholder engagement sessions worldwide.

Lluís brings a strong blend of technical depth and global perspective, enabling organizations to advance climate resilience and sustainable transformation.

AREAS OF EXPERTISE

Climate Change Adaptation

Climate Change

Circular Economy

Solid Waste Management

Leadership & Coaching

Registration & Contact

PROGRAM DETAILS

- 14th, 15th, and 16th July 2026
- 9:00 AM – 1:30 PM (GMT+3)
- 12 credit hours spread over three days of a virtual training program.

Who Should Attend?

- Leadership & Strategy (Executives / Board)
- Sustainability / ESG Professionals
- Operations & Supply Chain Professionals
- Procurement & Manufacturing Professionals
- Enabling Functions (Finance, HR, Product/R&D)

To proceed with company registration.
