Training on Agile Project Management

The screenshot shows a web browser displaying the Ed-Watch LMS login page. The page has a dark blue header with the Ed-Watch logo and the text "Your online resource partner". Below the header, there is a "New User? Sign Up" link and a "Login to LMS" button. A login form is visible with the email address "sherazkarem480@gmail.com" entered. To the right of the login form, there is a "Welcome to Ed-Watch" message and a list of services: "TECHNICAL TRAINING" (Certificate courses via Self-paced, Live classes & In-person), "MENTAL STRENGTH PROGRAMS" (Coaching & Psychological Assistance), and "BUSINESS & ECONOMIC FORUM" (Learning from Industry Icons through Masterclasses). The background of the image shows a person's hands typing on a laptop keyboard.

Program Overview

Agile is the industry's standard methodology for modern IT projects. The traditional waterfall approach to managing IT projects has been unable to keep pace with the fast-paced application modernization and digital transformation. Organizations worldwide continue to advocate for the adoption of agile techniques in order to deal with rapid organizational and technology changes. Although traditional project management methodologies have been the standard for many years, the continued pace of change means that project managers and organizations alike need to adopt new ways of developing and implementing projects. Effective implementation of agile practices requires a paradigm shift including a new mindset and new techniques.

The key takeaways from this training include:

- Understand and learn about Agile Project Management
- How Agile helps and what is required to make it work efficiently
- Methodology and general approach to agile project management.
- Must use agile project management techniques
- developing trends
- global and regional best practices for agile project management.
