Program Overview

Our comprehensive online training program offers a 6-month journey into the world of full stack web development. With a focus on C#, Angular/Typescript, and Dot Net Core, participants will gain a strong foundation in both front-end and back-end development. The program culminates in a final project where students will deploy a Dot Net Core/Angular application using Azure cloud services.

By the end of this program, participants will have a solid understanding of full stack web development, with proficiency in C#, Angular/Typescript, and Dot Net Core. They will be equipped to build dynamic, responsive, and secure web applications, and will have hands-on experience deploying their projects using Azure cloud services.

Introduction to Programming

Front End Web Development with Angular/TypeScript

Front-End Back-End Interaction
