IFRS STANDARDS ON SUSTAINABILITY – S1 & S2 VIRTUAL CLASSES

ed-watch
Your online resource partner

Program Overview

The IFRS Standards for Sustainability S1 and S2 are new sets of standards developed by the ISSB to address the growing need for organizations to integrate sustainability-related information into their financial reports.

This training program provides finance and accounting professionals with the knowledge and skills necessary to effectively implement and comply with these new standards. It covers a wide range of topics, including the identification and measurement of sustainability-related risks and opportunities, the integration of sustainability information into financial statements, and the reporting and disclosure requirements for ESG matters.

The training also emphasizes practical applications and case studies, enabling participants to apply their knowledge in real-world scenarios.

Upon the completion of this program, participants will be well-equipped to navigate the evolving landscape of sustainability reporting and meet the increasing demands for transparency and accountability.
