

# Environmental EMS Internal Auditor

*Master Environmental Audits. Ensure Compliance. Drive Sustainability !*

## Program Overview

This training program provides a comprehensive understanding of Environmental Management Systems (EMS), with a focus on the role of internal auditors in ensuring effective implementation and continuous improvement.

Participants will explore key EMS principles, ISO 14001 standards, environmental risk assessment, and auditing processes. The program equips professionals with the skills necessary to evaluate EMS performance, ensure regulatory compliance, and contribute to organizational sustainability goals.

### PROGRAM AT A GLANCE

- 25<sup>th</sup> To 27<sup>th</sup> October 2026
- 18 CPD Hours
- 8:00 AM - 2:30 PM (GMT+3)
- In Person Public Program  
In Riyadh (KSA)

## Key Learning Outcomes

✓ Understand the core principles and requirements of ISO 14001 and effective EMS implementation.

✓ Learn to plan, conduct, and report internal audits to maintain a compliant EMS.

✓ Develop skills to assess environmental risks, monitor compliance, and evaluate organizational performance.

✓ Apply best practices, analyze case studies, and create strategies to improve environmental outcomes.

# COURSE COVERAGE

## Module 1: Introduction to Environmental Management Systems (EMS)

- Understand the importance and scope of EMS in organizational sustainability.
- Overview of ISO 14001:2015 standard and its structure.
- Benefits of implementing EMS: risk reduction, compliance, and performance improvement.
- Roles and responsibilities of internal auditors within the EMS framework.

## Module 2: ISO 14001:2015 Requirements and Interpretation

- Detailed breakdown of ISO 14001 clauses and requirements.
- Context of the organization, leadership, and environmental policy.
- Planning for environmental aspects, compliance obligations, and risk management.
- Operational control, monitoring, and measurement within EMS.

## Module 3: Internal Auditing Principles and Process

- Introduction to auditing fundamentals and ISO 19011 guidelines.
- Planning, preparing, and conducting internal EMS audits.
- Interviewing techniques, evidence collection, and audit trails.
- Reporting audit findings, nonconformities, and follow-up actions.

## Module 4: Identifying Environmental Aspects and Compliance Obligations

- Techniques for identifying and evaluating environmental aspects and impacts.
- Legal and other compliance requirements: identification and monitoring.
- Tools for assessing environmental risks and opportunities.
- Integration of compliance checks within the audit process.

## Module 5: Auditor Competence and Ethics

- Understanding the personal attributes and skills of an effective internal auditor.
- Ethical considerations and maintaining objectivity during audits.
- Managing audit-related conflicts and sensitive findings.
- Continuous professional development and competency requirements.

## Module 6: Integration of EMS with Other Management Systems

- Benefits and challenges of integrating EMS with ISO 9001, ISO 45001, and other standards.
- Common elements and streamlined auditing approaches.
- Developing integrated audit checklists and audit programs.
- Case examples of organizations using integrated management systems effectively.

# TRAINER

## Alejandro López-Cortijo

Alejandro López-Cortijo is a highly experienced sustainability consultant with over 15 years of expertise in climate change, ESG integration, and environmental finance. He has led projects in carbon footprinting, net zero strategies, SBTi alignment, and implementation of ESG frameworks such as TCFD, EU Taxonomy, and ESRS.

A certified Second Party Opinion (SPO) provider under ICMA's Green Bond Principles, Alejandro has deep knowledge of regulated and voluntary carbon markets, environmental due diligence, and GHG emissions calculation and compensation. His work also covers circular economy initiatives, energy efficiency, and renewable energy deployment.

Alejandro is a founding partner at MinuteOne Partners, CEO at Altabatt EC, and an advisor to financial institutions on climate-related disclosures. He also serves as a freelance environmental auditor and associate professor at Nebrija University, mentoring future sustainability professionals.
